SELECTING A NEW DOOR

WARRANTY

Limited Lifetime on
Door, Hardware.
4 Year on Springs.
Our Quality Assurance,
Your Peace of Mind.
(See Warranty Page For Details)
www.uniquegaragedoor.com

STEP 1

CONSTRUCTION

When choosing a new door, you have three options on the construction of your door. First, there is our standard 2" non-insulated door, referred to as a Pan Door. Second, is our 2" thick Super Poly Insulated Door which includes a single layer of steel plus a rigid polystyrene core with 3mm thick Super Poly Back Skin. Strong enough to walk on and is exclusively from Unique. No other company offers it. Your third choice is our 2" thick Insulated Sandwich Steelback. Unique's Steelbacks are strong with a rigid polystyrene insulated core with a steel woodgrain textured back skin.

***Unique's Pan Door is strong,
our Polyback is stronger
and our Steelback is the strongest!
Three good reasons to choose Unique.***

1-GOOD

Super Polyback

2-BETTER

Steelback

3-BEST

STANDARD 2" THICK NON-INSULATED

GOOD

PAN DOOR

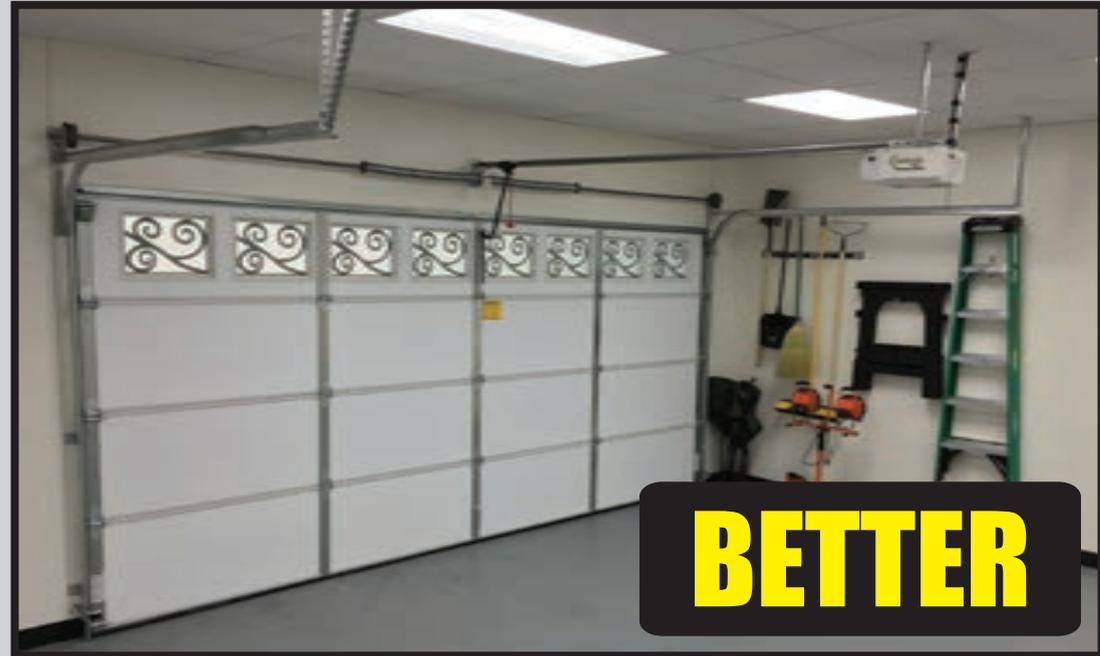

**YOU CAN NEVER GO WRONG
WITH QUIET AND STRONG!**

OUR STANDARD 2" thick non-insulated pan door features our exclusive raised shadow line for EXTRA STRENGTH. It prevents oil canning. Oil canning is waves and dips that pop and ping on the face of garage doors. Unique provides extra strength for no extra cost! Unique uses our own Formula 124 steel that is thicker and heavier than other manufacturers 25 GA or 26 GA models. Strong and quiet are very important at Unique that is why we use heavy duty thicker end and center brace stiles to better support your door. Unlike others our end stiles are quiet bonded and mechanically fastened to insure quieter stronger operation. For second to none protection from the outside weather environment. We use a 1 Mil thick baked on polyester paint coating outside and unlike others, that use a 1/2 Mil finish on the inside we use a full 1 Mil thick for better protection inside and out. Hot dipped galvanized steel construction for more protection is standard. Add in a rust proof bottom weather seal retainer with replaceable bottom seal and you have great protection from the elements. **UNIQUE QUIET AND STRONG!**

SUPER POLY- BACK INSULATED- SECOND TO NONE

ORIGINAL US PATENT # 10,407,976

Thick 3mm Super Poly-Back is one thing. **STRONG!** Stronger than others paper thin vinyl poly. So strong you can walk on it! Stronger against bumps, more resistant to dents and cuts. Plus, it's fluted design traps air inside helping to raise the energy R-Value. Add in UV protection for no yellows, and **YES**, you **CAN** have it all!

THE COMPETITION HAS CRACKED!

OTHERS (PAPER THIN)

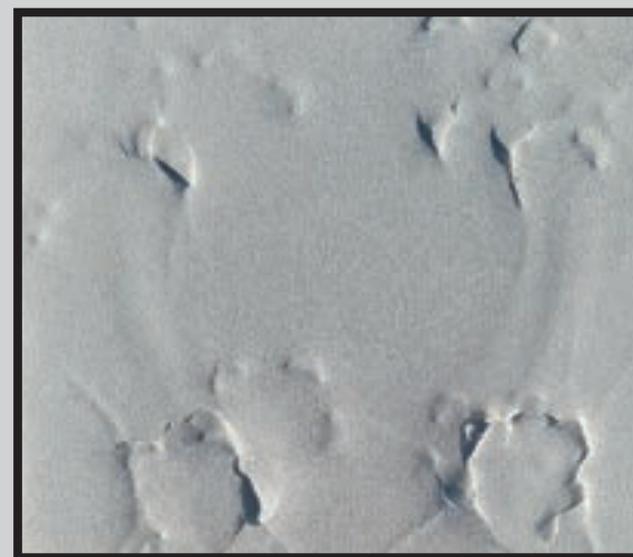

**Paper thin hair cell
plastic vinyl poly.
Punctures easy.
Tears easy.
Cuts easy.**

TURNS YELLOW

**Turns yellow easy.
No UV protection.
Even though it never
gets direct sun it yellows.
The heat from inside your
garage will turn it yellow.
Then it turns brittle and
thats it!**

CRACKS AND DENTS

**Cracks, dents, punctures.
You can not walk on it. This
is what happens after
being hit with garage
objects.**

2" THICK SANDWICH INSULATED STEELBACK

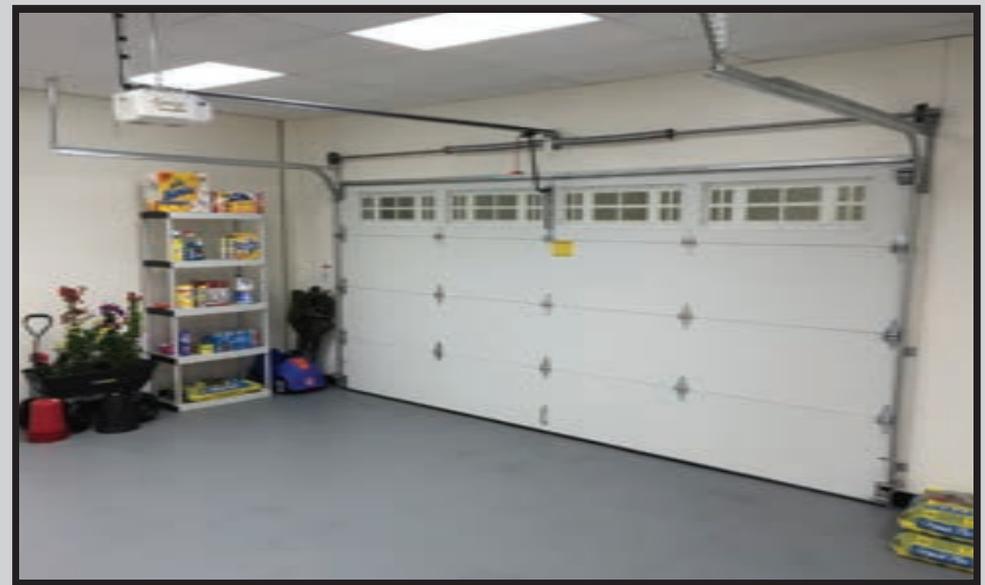

BEST
STEELBACK

**WITH A CALCULATED
R-VALUE OF 10...
IT MAKES IT THE BEST**

A STEP ABOVE, A LOOK APART. SIDE BY SIDE COMPARISON TO STANDARD WOODGRAIN DOORS WILL SOLIDIFY OUR POINT. IT JUST LOOKS BETTER! MORE AUTHENTIC, MORE DETAIL THAN ANY OTHER STEEL DOOR .IT'S SO UNIQUE AND ONE OF A KIND! TRUE LOOK DOORS ARE PATENT PENDING.

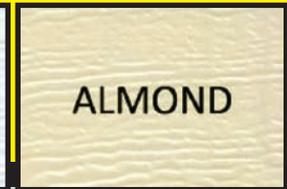

Having a Unique Steelback is like having an insulated block wall that rolls up and down every day. They are stronger, quieter, safer, and also offer more security! Our steelbacks have a three layer construction that includes woodgrain steelback with safe, stable, rigid polystyrene insulation. Rigid polystyrene is not going to bubble, delaminated or become brittle like some of the higher R-value polyurethane doors being offered by other companies. We only use rock solid polystyrene which is tried and time tested. Our Unique process of special density foam and two layers of steel with our pressure-max bonding say it all. Our steelbacks offer rock solid performance because we only use solid sheets of foam unlike other companies that use multiple pieces to insulate. Our steelback is a stronger, energy efficient and a more quiet model.

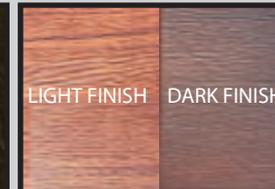

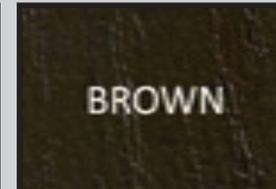

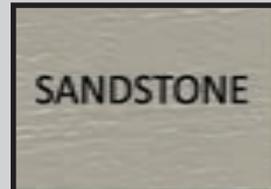

SELECTING A NEW DOOR

★ Please ask your dealer for actual color chip sample before ordering. Colors printed in catalog may vary from actual color of door. ★

STEP 2

READ PAINTING INSTRUCTIONS BEFORE PAINTING ANY DOOR!

FACT

All Unique Models come with the World's Quietest Hardware, regardless of Model or Type of Construction. Featuring a top of the line and one of a kind Heavy Duty Quiet System. Others charge more for less. Quiet is standard at Unique and will not cost you a penny more. Plus a Lifetime Warranty for peace of mind.

**THE THICKEST AND
STRONGEST
PERIOD!**

SMOOTH WHITE

SMOOTH BLACK

SMOOTH GALVANIZED

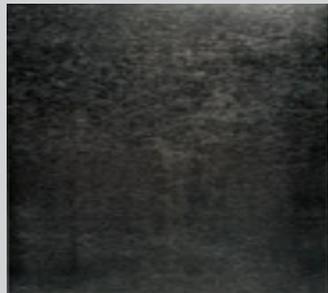

This is the Thickest, Strongest Residential Flush Smooth Door offered today! Our Formula 122 Steel is 15% thicker than 24ga steel doors. Thicker, Stronger, Better. Period! The most important thing you need on a Flush Smooth Door is thicker steel. More dent and ding resistance, table top flat, smoother and stronger! This door stands up to most all driveway life. From bouncing balls to extreme weather. All F-122 Flush Smooth Doors come with our patented Heavy Duty 11ga Quiet Hinges, and 1 Patented Premium Super Strut per section of door. Double end stiles for extra strength plus high wind loads!

THIS DOOR HAS IT ALL!

Our Smooth Modern Galvanized gives you many architectural color and design options. Leave it untouched and age naturally or put a sealer on it to keep it new looking. You can choose to custom patina it from 5 available colors that are offered from our chemical manufacturer. Sealer and patinas both offered, visit our website to see our options. Unlike some so called custom doors that are cheap insulated doors with sheets of riveted steel with exposed seams and rivets showing, our doors are seamless. Even after they are patinaed, they are Smooth flush and Seamless. NO ugly rivets! NO seams down middle of door! We manufacture only the best!

BLACK PATINA

YELLOW PATINA

BROWN PATINA

RED BROWN PATINA

RUSTY ORANGE PATINA

These are only examples. It would be impossible to show all of the options. How long you leave the patina chemical on will vary the color. Different techniques and mixing patinas will result in many different variations and colors. It's basically a blank canvas for an artist. ***"Your Picasso Awaits you"***

- 5** Heavy Duty Threaded Wind Load and Safety Roller (Optional)

WHAT MAKES UNIQUE SO UNIQUE?

ONLY FROM UNIQUE!

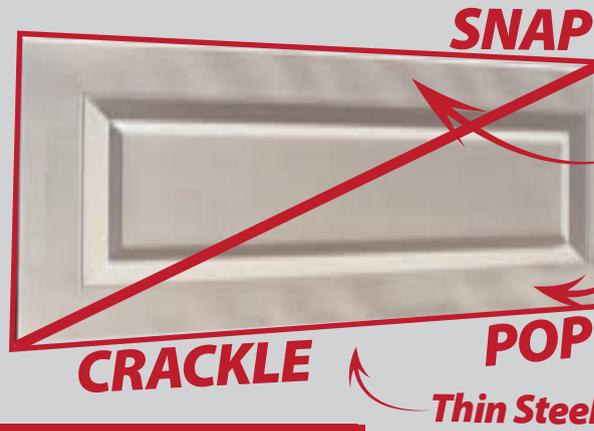

Raised shadow line is an industry first! It eliminates oil canning in the space between the raised panel and the section joint. No ugly bumps. No pops and pings, and has extra strength for life! It gives the Unique raised panel a one of a kind picture framed look, strength, and style at no extra cost.

SHORT PANEL

THE OTHER GUYS? STANDARD STRENGTH STANDARD NOISE, STANDARD LOOK

Shallow standard raised panel design made by others lacks the crisp deep bevel cut detail. A flatter appearance that fades the farther you stand back, with very little curb appeal. Popping and pinging may occur from excessive oil canning.

SNAP

CRACKLE

POP

Thin Steel!

OIL CANNING

Oil Canning is apparent on the top and bottom of the raised panel. It stands out more as sunlight hits the door from different angles.

This can lead to cracking/splitting and premature door failure

UNIQUE EXCLUSIVE

Raised shadowline gives a picture perfect look. It makes the door stronger and eliminates oil canning.

LONG PANEL

LESS NOISE

Others use pencil grooves or nothing at all! They do not do the job like Unique's raised Shadow Line does. Popping and pinging may occur from excessive Oil Canning. If this happens it can lead to cracking, splitting and premature door failure. As your door goes up and down day after day, it bows and flexes. As the flexing occurs the metal fatigues and starts to crack and split. To understand, take a thin piece of metal or plastic and bend it back and forth over and over. It will break in half! This is what can happen. Unique Raised Shadow Line prevents this and makes the door sections stronger. Exclusive technology that not only makes your door look better but last longer...That's Unique!
